Re: Response to Questions and Revision of Chemical
Processors, Inc. Pier 91 Facility Part B Permit
Application

Dear Ms. Gilder:

Please find enclosed the response to questions from Ecology regarding the Pier 91 Facility Part B Permit Application, and related revisions to the permit application. The request for response to these questions was made by Doug Brown of your office at a meeting with Chempro on February 1, 1991; a copy of the draft Washougal Facility NOD highlighted to identify questions relevant to Pier 91 was handed to me at that time. The submittal date for Chempro's response and accompanying Part B permit application revisions was communicated in a letter from you to me dated March 6, 1991.

Two sets of revisions are being supplied to Ecology for copies 1 and 2 of the permit application. Two copies of the permit application revisions have also been sent to EPA. A yellow tag marks the set of revisions which includes an original signature page for Form 3 of the facility's "Part B Part A."

Please place these revisions in your copies of the permit application as indicated on the instruction sheets provided. I can be reached at 223-0500 if you have any questions.

Sincerely,

Catherine L. Buller
